Professional Experience

Cloud and Linux Engineer,
Atos Global IT solution Pvt Ltd
October 2023 – present

- Provisioned, configured, and managed virtual machines (VMs), storage accounts, and Azure Active Directory (AAD) resources in Microsoft Azure, ensuring high availability and scalability for client applications.
- Orchestrated containerized workloads using Azure Kubernetes Service (AKS), Docker.
- Configured and monitored Azure monitoring and logging services, including Azure Monitor, Log Analytics, and Application Insights, to track system performance, diagnose issues, and ensure compliance with SLAs.
- Collaborated with cross-functional teams to design and implement Azure DevOps pipelines for continuous integration and continuous deployment (CI/CD) of cloud-native applications, automating software builds, testing, and deployment processes.
- Stayed current with Azure best practices and emerging technologies through self-study, online courses.
- Provided technical support and troubleshooting expertise for Linux server environments, resolving complex issues promptly to minimize downtime and maintain service availability.

Linux Administrator, *Atos Global IT solution Pvt Ltd*
August 2022 – October 2023

- Managed and maintained a Linux server environment, including Redhat & CentOS.
- Implemented security best practices to protect Linux servers from unauthorized access and including user management such as adding , removing .firewall configuration, and intrusion detection systems.
- Conducted routine system monitoring and performance tuning to optimize resource utilization, minimize downtime, and meet service level agreements (SLAs).
- Performing scream test changes and decommissioned tasks for the servers.
- Troubleshooted and resolved hardware and software issues on Linux servers, collaborating with cross-functional teams and third-party vendors as needed to ensure timely resolution.

Certificates

- Microsoft Azure Fundamentals (AZ-900)

- • Microsoft Azure Administrator (AZ-104)

- CompTIA Linux+ XK0-004 (Internal Certificate)

- ITIL4 Fundamentals (Internal Certificate)

Interests

Swimming, Travelling, Writing, Martial art training.

- Performed regular software updates and patch management to maintain system security and compliance with industry standards and regulatory requirements.
- Having practitioner level knowledge of Azure and AWS.

Profile Summary

Dynamic and dedicated Linux and Cloud Technology Engineer with 1.10+ years of hands-on experience in implementing, and maintaining robust IT infrastructures. Proficient in Linux system administration, cloud computing platforms, and containerization technologies (Docker, Kubernetes). Adept at troubleshooting complex issues and providing timely resolutions. Committed to staying updated with the latest industry trends and technologies to deliver innovative solutions. Strong team player with excellent communication and collaboration abilities.
